

eCommerce

# Development

---

Development based on Magento, Wordpress and Joomla and Shopify platforms. Using the most popular CMS' we create websites and web stores of any complexity. Accordingly to client's needs we can apply ready-made themes with additional customizations or develop a brand new website from scratch.

# Ongoing Support

---

To keep your website up to date and safe it's necessary to update a system, modules and plugins regularly. Also ongoing support includes small fixes and any required technical assistance.

# Custom Extensions Development

As each project is unique in a way, it may require some specific features. We can easily create an extension to implement new functionality to your website. It can be anything from an additional block to integration with third party services. Some of our extensions are available for purchase.

# Design

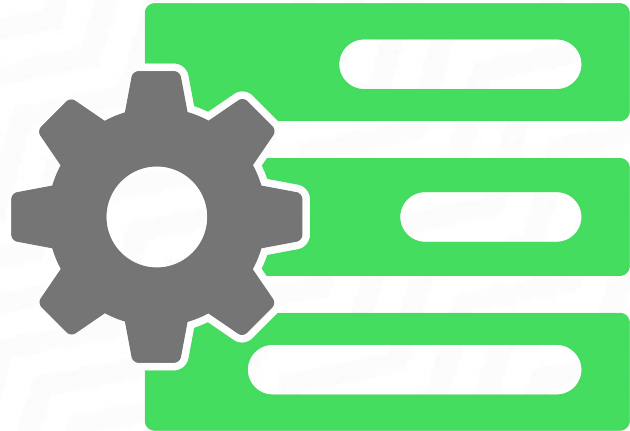

---

Modern ecommerce market is presented by thousands of web stores. Your products and advantages are important, but it's design that makes your website special. Using our expertise we can create a unique design to make your website responsive, attractive and user friendly.

# Server Maintenance

---

Your server characteristics are quite important for website performance. Even powerful server can be useless without proper settings. Our highest level of expertise allows us to get your site to perform at its max potential.

# Hosting

---

We handle hosting which is optimized perfectly for any web store. So you can forget about technical headache and be sure that your website is hosted properly.

# Ready-made Solutions

---

Knowing our clients needs and problems, we create custom solutions, that ensure your business is up and running in no time.

# Our Clients
