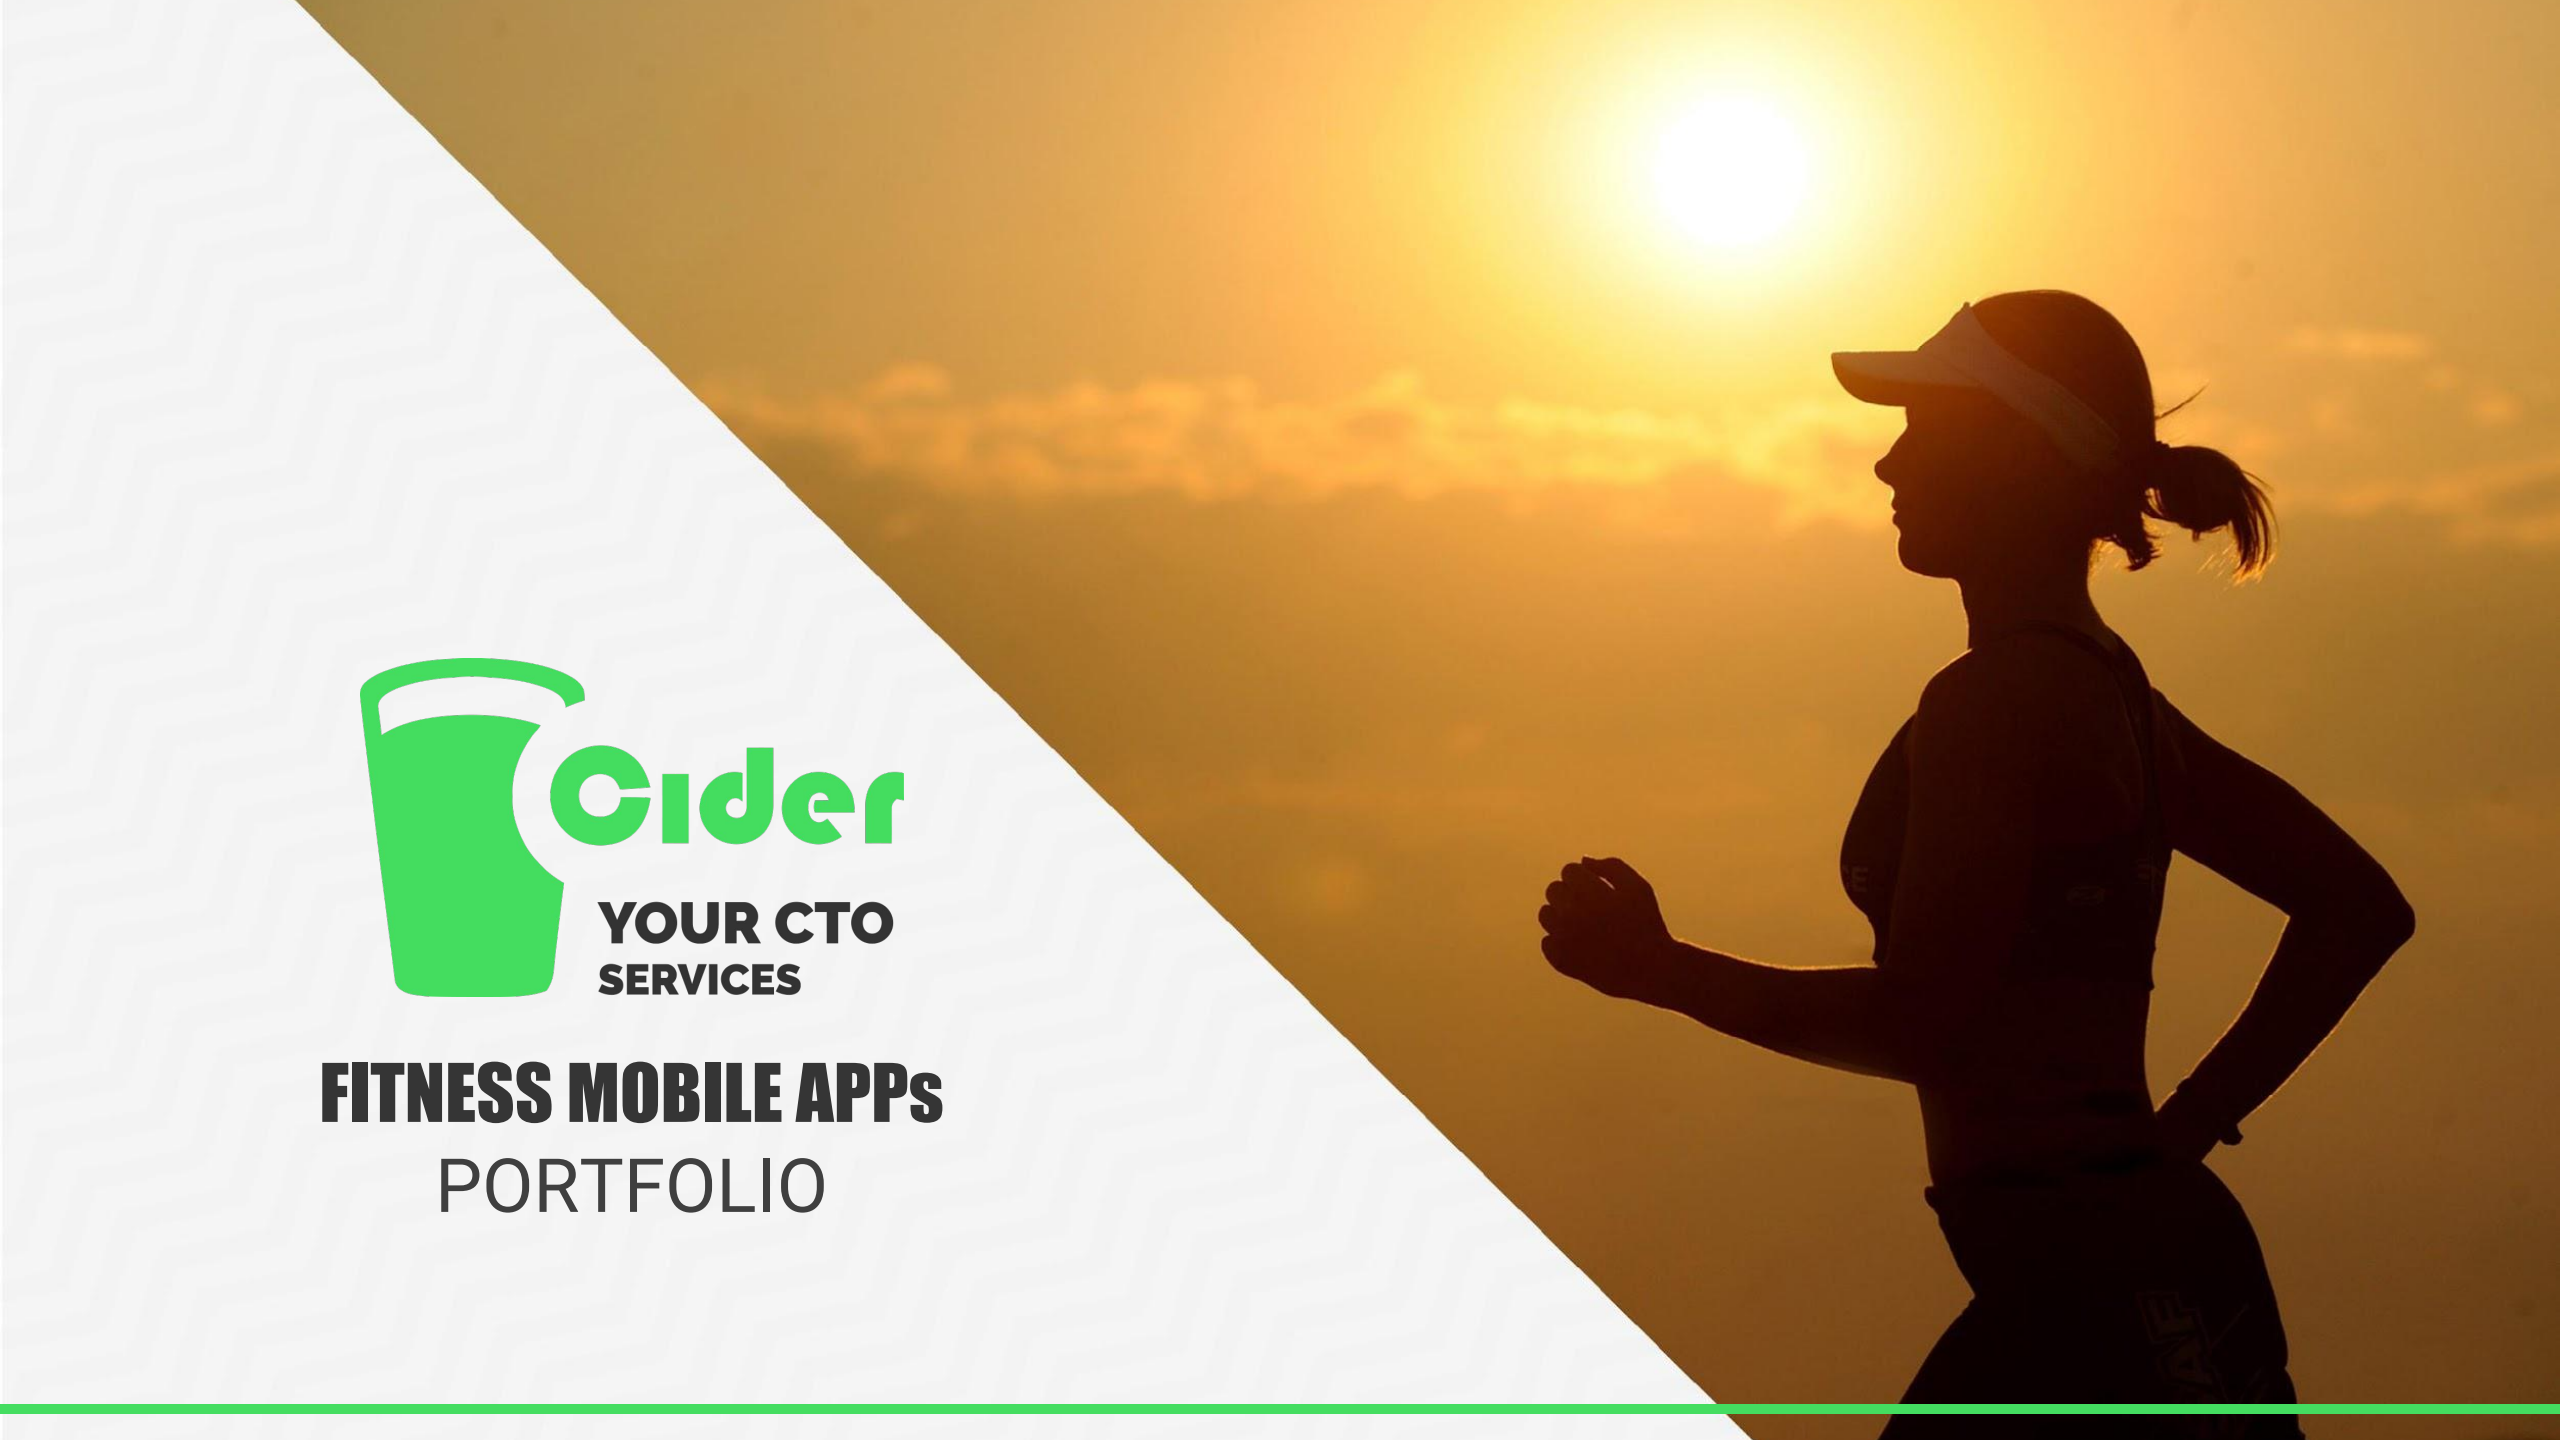
FITNESS MOBILE APPs

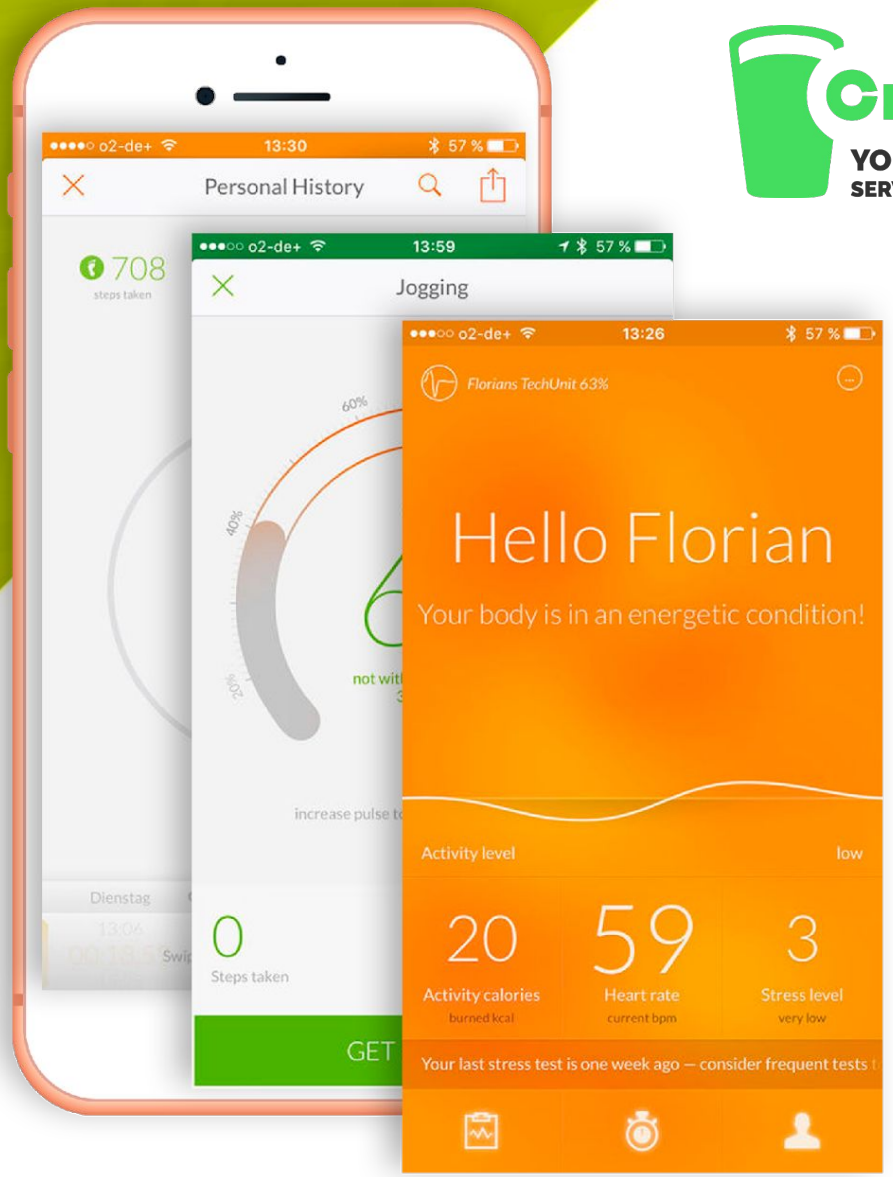
PORTFOLIO



ambiotex

understand your heartbeat

Is a product for measuring your vital data by **intelligent technology,** which is integrated into a **high-tech shirt.**



GOAL

Compared to many other products, our client wanted to develop an intelligent sports shirt with special components, by which the athlete would be able to capture his or her vital parameters and activities.

The main challenge was lack of details among the API documentation and questionable back-end architecture and.

TECHNOLOGIES

- ECG sensors
- TechUnit
- GPS Tracks
- Bluetooth Low Energy

uActive

Health and Fitness Tracking App

uActive provides a complete overview of your daily activity and measures the effectiveness of your workout.

TECHNOLOGIES

- AFNetworking
- Flurry
- CoreData
- Twitter
- XCtest
- Facebook
- Storyboard
- StoreKit

GOAL

The goal was to create an iOS app that consolidates information from all of the popular trackers such as pedometer, smart watches, and sports bracelets.
It tracks the dynamics of physical activity and individual indicators to provide a fuller picture of your workout effectiveness. The app also generates a PDF report that can be easily shared.

SKLZ CAM

for Video Analysis

SKLZ Cam is the video coaching app, that delivers professional sports video analysis to your device

GOAL

The goal was to create a mobile app that in a few easy steps allows to record athletic movements for coaches, trainers or others to analyze and send back with their recorded drawings and comments.
Our patent-pending side-by-side comparison allows to adjust slow motion frames to pinpoint exact differences between two similar videos.

TECHNOLOGIES

- FFMPEG
- Glide
- Custom Views
- SurfaceView
